Setup Instructions

1. Install the panel light on the base and tighten the knob to fix it.

Setup Instructions

EN

2. Adjust the angle as required.

Use Instructions

"Timer Button:
When the timer is set, the button lights up white for 60 minutes and blue for 30 minutes. If the indicator light is off, the timer is not active.

"M"Color Temperature Switch Button:
When the light is on, you can cycle through 5 different color temperatures. (The indicator light of the button "M" changes color to match the current color temperature of the light itself.)

"Brightness Up Button:
When the round panel light is turned on and its brightness level is set to the highest level, the button lights up in white to indicate the current brightness is at the highest setting (10 brightness levels available).

"Brightness Down Button:
When the round panel light is turned on and its brightness level is set to the lowest level, the button lights up in white to indicate the current brightness is at the minimum (10 brightness levels available).

"Power Button:
When the power indicator lights up in white, tap it to power the panel light on/off (the indicator will turn off when the light is on).

Notes

1. Do not subject the product to any impact or collision.
2. To protect your eyesight, please avoid looking directly at the light.
3. Turn off the power when not in use.
4. Secure the desk mount tightly to prevent accidental falls and damage.
5. Please use only the included power adapter to power the device. Using an incompatible adapter may cause fire or explosion.
